

Storm Water Public Outreach RFQ

Answers to Questions 11/1/2016

1. Can you provide more detail about what Park City would be looking for in a scientifically valid survey? This can mean a range of things and can vary greatly in cost accordingly.

Park City desires a study that can reasonably be relied on to gauge our resident understands of stormwater and their impact on it. With that said, Public Utilities is not an expert on surveys and doesn't desire to spend a great deal of money. A proposer may identify different options that meet this need and price estimates for those options.
