

EVACUATION

Several types of disasters may force you to be evacuated from your home. If you are told to evacuate, take the following steps:

- Respond immediately, failure to respond may be life threatening and emergency responders may not be able to return to your area should you not evacuate.
- Listen carefully to instructions given by local authorities. Monitor KPCW Radio 91.7 FM or Park City Highway Alert Radio 1700 AM. Evacuate immediately if told to do so.
- Do not call 911 unless there is a life threatening situation.
- For the Park City Community Hotline call 435-615-5999 for a recorded message.
- If you have time, grab your portable disaster supply kit. Make sure that you include any last minute items, such as prescription medications, that you may need and supplies for your pets.
- Wear appropriate clothing and sturdy shoes.
- Lock your home.
- Take money and credit cards with you and any important papers.
- Use travel routes outlined by local officials. Do not take short cuts; they may be unsafe.
- If you go to a shelter, notify staff of any special needs you may have. They will try to accommodate you and make you comfortable.

Be prepared to leave home if:

- Your area is without electrical power or water for an extended period of time.
- There is a chemical emergency affecting your area.
- Flood water is rising.
- A wild land fire is burning near your home.
- Your home has been severely damaged.
- Local official tell you to evacuate.
