

REQUEST FOR QUALIFICATIONS
**Park City Water Department Energy Management and System
Optimization study**
ADDENDUM No. 2

Thank you all for your questions and comments.

- The 4:00pm **October 15, 2015** deadline remains.
- There is no specific budget at this time, please provide a list of the potential team and a charge-out rate table for the personnel.
- Park City's hydraulic model was created using ESRI ArcGIS software along with Innovyze Infowater. The model is up to date as of June 2015 and includes all piping of size four inches and larger.
- The selected contractor will have access to our hydraulic model and other data and ideas we may have. The goal is to work with staff to create a more efficient system
- Lengthy narrative is discouraged. Emphasis should be on completeness and clarity of the content. Double-sided printing, with coil or wire binding is preferred. The page limits identified below do not include table of contents, dividers, etc., 11" x 17" pages are allowed for charts and figures only, and will be counted as a single page. Inclusion of general promotional and marketing material is highly discouraged.
- *Clarification, Page 9: A. Rate Structure and Fee vs. Proposed time frame and hours required to complete the project*
 - A. (5 points) Is less important, meaning the overall fee is less important than C. (25 points) the proposed plan and timeline.
