15-2.1-5 Building Height

- A. **BUILDING HEIGHT EXCEPTIONS.** The following height exceptions apply:
1. Antennas, chimneys, flues, vents, or similar Structures, may extend up to five feet (5') above the highest point of the Building to comply with International Building Code (IBC) requirements.
 2. Water towers, mechanical equipment, and associated Screening, when Screened or enclosed, may extend up to five feet (5') above the height of the Building. Solar energy systems shall be exempt from the screening requirement, subject to design review by the Planning Department.

15-5-5 Architectural Design Guidelines

G. SOLAR ENERGY SYSTEMS PANELS AND SKYLIGHTS. Any solar ~~energy system~~panel or skylight, or other translucent roof material which allows the transmission of light from the interior of the Building to the exterior, shall be designed as follows:

1. Skylights shall be limited to no more than twenty-five percent (25%) of the total roof Area;
2. The skylight design shall facilitate the Use of natural light in to the Building and any light emitted or reflected from the skylight shall be shielded from adjacent Properties;
3. The skylight feature shall not be the highest point of the Structure; and

4. The skylight feature shall be designed to fit as flush as possible with the roof. Skylights shall generally extend no more than two feet (2') above the roof plane.
5. Solar energy systemspanels shall be designed so as to be incorporated in the roof plan or architectural features of the structure to the best extent possible. Solar energy systemspanels shall generally be mounted flush to the roof plane. In instances where due to the existing roof angle the panel needs to be angled from the roof plane for optimum solar gain, alternative designs may be considered upon review of a visual analysis and mitigation of visual impacts from surrounding properties.
6. Skylights and solar energy systemspanels in the Historic Districts are subject to the Design Guidelines for Historic Districts and Historic Sites.

K. MECHANICAL EQUIPMENT. All electrical service equipment and sub-panels and all mechanical equipment, including but not limited to, air conditioning, pool equipment, fans and vents, utility transformers, except those owned and maintained by public utility companies, and solar energy systemspanels, shall be painted to match the surrounding wall color or painted or Screened to blend with the surrounding natural terrain. Roof mounted equipment and vents shall be painted to match the roof and/or adjacent wall color and shall be Screened or integrated into the design of the Structure. Minor exceptions to Setback requirements for Screened mechanical equipment may be approved by the Planning Director where the proposed location is the most logical location for the equipment and impacts from the equipment on neighboring properties, historic facades, and streetscapes can be mitigated and roof top mechanical placement and visual clutter is minimized.
