I. INTRODUCTION

Park City Municipal Corporation (“PCMC”) seeks proposals from an artist(s)/teams that will create and build a structure that represents PCMC’s dedication to water conservation and sustainability in distribution. PCMC is looking for proposals that incorporate as much of the materials provided for the purpose of up-cycling; proposals that demonstrate the installation will withstand snow, ice, rain, and sunshine, and sturdy enough to remain standing if climbed on; proposals that will not only captivate onlookers, but entice interaction with apparent moving parts for children and adults alike. Total project maximum budget is Thirteen Thousand Dollars (\$13,000.00). The art installation will be an educational attraction worth visiting.

II. PURPOSE OF PROJECT

PCMC is seeking an artist or artists’ team to build an installation with up-cycled material in front of the new Creekside Treatment Plant. This is a unique location for a water treatment plant because it will be frequented by many varied community members. The new building offers shade for the park’s visitors and is nestled between a public playground and public restrooms. It is also just a quick stride away from the Creekside Bike Path and Jump Park.

The idea was inspired by a growing mound of residential meters removed in the summer of 2017 for an upgrade, and were bound for the metal scrapper. The purpose of the project is to reuse the materials from the meter upgrade and other materials saved from distribution. These include wooden piping, yokes, wheels, and pieces of steel pipe as reflected on Exhibit “B” attached hereto and made a part hereof. If required to convey the artist’s vision, newer materials might be available depending on desired amount and type needed. The repurposing of these materials represents PCMC’s dedication to moving towards sustainability, with the added benefit of educating the public about our historic infrastructure in water distribution. Hiring a local artist to represent PCMC in a creative vivid image of conservation will add interest among the community. This project will be a valuable educational avenue for PCMC.

III. PROJECT SCOPE

- Art installation will be installed on the lawn in front of the north facing wall and shaded awning of the Creekside Water Treatment building. For max size dimensions please consult plans reflected on Exhibit “A”.
- Art installation will be reviewed and approved by the Park City Municipal Building Department.
- The installation will need to pass a third party building inspection for which the artist(s)/team is fiscally responsible.
- Art installation must be secured to the ground and withstand weather including wind, snow, ice, and rain, and bear weight. We want to discourage climbing on the installation either through design or by a sign that reads “do not climb”.
- Power may be available for this project.
- To be ADA compliant, the installation should not obstruct use of the sidewalk, and the majority if not all of its interactive parts must be accessible from the sidewalk.
- The integration of repurposed materials with new material required for a pleasing visual appeal, functionality, and security should be eighty percent (80%) repurposed to twenty percent (20%) new. (See Exhibit “B”)
- The installation construction can begin on September 14, 2018. The selected artist(s)/team will be required to coordinate schedules with the Project Manager.
- The artist(s)/team selected is responsible for the design and creation of the art including performance of the services specified, but not limited to storage of materials, artist labor, insurance, materials costs, lighting, transportation, lodging, delivery, overhead, anticipated fabrication and installation cost and permits as required by City departments. The artist(s) are responsible for maintenance of the work for one (1) year after final acceptance of the project. Permit fees and maintenance costs shall be included within the project budget.

- The artist(s)/team selected shall work with the Project Manager on all matters of the project including location, specific medium/materials, budgetary considerations, installation timelines and access to the space, as well as other items that pertain to the coordination of the project.

Artwork Location and Constraints:

The proposed location for the art installation is outlined in red and is labeled 12' x 10' in Exhibit "A". It is a central location in Creekside Park directly in front of treatment plant's shade awning, between the toddler's playground and the public restroom. This area is expected to see a lot of foot traffic, therefore the artist will need to secure the installation to the ground. This area also gets a lot of sun, so consider the heat of the metal work in your design. The lawn is one hundred twenty (120) square feet. One third (1/3) of the border is confined by a concrete bench, the other two thirds (2/3) is bordered by a sidewalk. The art installation cannot obstruct the sidewalk or compromise the integrity of the bench. There is no limit to the height of the installation; however, it must be approved by a licensed engineer; it must not facilitate access to the treatment plant's roof. If needed, the artist(s)/team may consult with the Project Manager.
