

Peak Period Traffic Mitigation

January 15-February 21

We are expecting heavy traffic from January 15-February 21. Let's work together to keep Park City moving!

Roadway congestion in Park City typically increases between 7:00-9:00 a.m. and 3:00-6:00 p.m. daily. During these times, we encourage travelers to plan ahead, reduce traffic by carpooling, take free transit, and adjust schedules when possible. Parking, Transit, and Drop and Load/Curbside Pick Up information is available at parkcity.org.

Want to be the first to know? Text 'RIDEON' (one word) to 888-777 to subscribe to real-time travel-related text alerts.

Message boards will also be used to help direct vehicles accordingly. Tune into HWY ADVISORY RADIO for more info.

Implementation plans and tactics may be adjusted as necessary.

A few things to keep in mind:

- **Free Transit** – Park City Transit is free and operating with COVID safety protocols in place. View schedules, routes and COVID safety protocols at parkcitytransit.org.
- **Parking on Park Avenue** – Some parking will be removed on Park Avenue to better accommodate transit and vehicles through the narrow roadway.
- **Pedestrian Management** – please cross the street in designated crosswalks. Officers will be stationed in various locations to assist with flow of vehicles and pedestrians.
- **No Double Parking** – Double parking backs up traffic and adds to the congestion. Pull to the curb when dropping off guests. There are designated drop-and-load zones throughout Old Town.
- **No Through Traffic** – Our Old Town streets are very narrow and not made for through traffic. Please do not cut through residential neighborhoods to avoid traffic. Residential areas will be patrolled.
- **Plan Ahead** – Paid Parking is available in the Main Street Old Town area. Access the China Bridge Parking Garage from Swede Alley. Don't want to pay for parking? Park at Ecker Hill Park-and-Ride and ride transit into town. For additional parking information: parkcity.org/departments/parking.
