10MB
THE HARD DISK YOU'VE BEEN WAITING FOR
XCOMP introduces a complete micro-size disk subsystem with more
• MORE STORAGE
• MORE SPEED
• MORE VALUE
• MORE SUPPORT
S100 users . . . The XCOMP subsystem is now available with 10 megabytes of storage. 5 megabytes also available at $2,899.00. Compare the price and features of any other 5¼-inch — or even 8-inch — system, and you'll agree that XCOMP's value is unbeatable.
OUTPERFORMS OTHER HARD DISKS
Floppy disk and larger, more expensive hard disks are no match for this powerful little system. More data is available on every seek: 64K on 10MB and 32K on 5MB. Faster seek time too — an average of 70MS. Faster performance anywhere with only 20 minutes of power. Data is protected in the sealed enclosure. And the landing zone for heads provides another margin of safety. The optional power board plugs directly into the S100 bus and provides power for the drive.
FAST CONTROLLER
The XCOMP controller is the key to this system's high efficiency operation. Speed-up features include interleave without table lookup, block deblock with controller buffer, and read lookahead. OEMs world wide have already proven the outstanding performance of the XCOMP controller.
MORE SOFTWARE
Included with the system is software for testing, formatting, I/O drivers for CP/M®. Also an automatic CP/M driver attach program, and Debug®, are also available. The drivers for MP/M® and Oasis® support software and sophisticated formatting program assigns alternate sectors for any weak sectors detected during format, assuring the lowest possible error rate — at least ten times better than their floppies.
WARRANTY
The system has a full one-year warranty on parts and workmanship.
ALSO AVAILABLE FROM XCOMP
• General Purpose controllers (8 bit interface), with easy interface to microprocessor-based systems.
• GP controller adapter that plugs directly into most computers.
• ZBG controller for the SMB and 10MB drive
• ST/R GP controller for SA1000 type interface. above, with ST506 type interface.
• SG/R GP controller for storage module drive.
• SMB, SMD, SMG, same as above, for the
• STS, SGS, and SMG, same as above, for the S100 bus.
Quantity discounts available. Distributor, Dealer, and OEM inquiries invited.

FOR THE FISCAL YEAR ENDED JUNE 30, 1984

RUBBER & CORK

This is the computer . . .
that taught this boy . . .
TRS-80 Computer Consultant Ralph Lipe of Fort Worth, Texas
to write this program!
TRS-80™ . . . from $499* (Level I, 4K)
Fourteen-year-old Ralph Lipe taught himself to program a TRS-80 Microcomputer System with Radio Shack's "plain language" instruction manual. Then he developed a program for completing the IRS 1040-A tax form that took top honors at his school and regional science fairs. That was last year.
This year Ralph is in high school and working part-time as a computer consultant. Everyone from grade schoolers to graduate students can use the world's best-selling microcomputer, the TRS-80. It doesn't do your thinking for you — it helps you learn to think. Think about it!
Meet TRS-80's Big Brother!
New TRS-80 Model II
Systems from $3450
We've added a bigger, more powerful "brother" to the TRS-80 family. It's TRS-80 Model II, a completely new microcomputer for business applications. Its capabilities begin where Model I approaches upper limits. Storage capacity from ½ megabyte to 2 megabytes! For earliest delivery, order now from any of our 7000 locations.
Radio Shack
The biggest name in little computers™
A Division of Tandy Corporation • Over 7000 Locations in 40 Countries
*Retail prices may vary at individual stores and dealers.
