### **NOTICE OF PLANNING COMMISSION ACTION**

Project Description: Park City Heights Master Planned Development

Project Numbers: PL-10-01028

Project Location: Richardson Flats Road, west of US 40 and southeast of SR 248

Date of Final Action: May 11, 2011

Action Taken: Planning Commission conducted a public hearing and APPROVED the Park City Heights Master Planned Development in accordance with and subject to the following findings of fact, conclusions of law, and conditions of approval:

#### **Findings of Fact**

1. The Park City Heights MPD includes the following:
  - a. 160 market rate units distributed in a mix of: cottage units on smaller lots (lots are approximately 6,000 to 8,600 sf in size); single-family detached units on approximately 8,000 sf to 27,000 sf lots; and single-family detached on two upper lots which are approximately 44,000 and 48,000 sf each. The approximate distribution of types of product is identified in the Design Guidelines.
  - b. 28 deed restricted townhouse units (44.78 affordable unit equivalents or AUE). These 28 units meet the required IHC affordable units under their affordable housing obligation and are configured as seven four-plexes.

- c. 16 deed restricted units (32 AUE). These 16 units meet the affordable housing required by the CT zone (LMC 15-2.23-4(A) (8)) and the Affordable Housing Resolution 17-99. These units are configured as a mix of single-family detached, cottage homes, and townhouse units.
- d. 35 additional non-required deed restricted affordable units in a mix of unit types.
- e. All units (including all deed restricted units) will be constructed to LEED for Homes Silver rating, as stated in the Annexation Agreement, with each unit also achieving a minimum combined 10 points for water efficiency/conservation. Third party inspection will be provided. An industry standard Third Party inspector shall be mutually agreed upon by the Chief Building Official and the applicant prior to building permit issuance.
- f. A total of 171.5 acres of open space (not including open space within individual lots) is provided. This is approximately 72% of the entire 239 acres. This total includes the 24 acre parcel located adjacent to Highway 248 that is deeded to the City for open space.
- g. An additional 5 acres of deeded open space is provided on Round Valley Drive adjacent to US 40 south of the Park City Medical Center. This open space is not included in the 72% figure. This is in exchange for transferring the 28 IHC deed restricted townhouse units to the PC Heights neighborhood. This parcel is deed restricted per requirements of the Burbidge/IHC Annexation and Development Agreements.
- h. A dedicated 3.55 acre (155,000 sf) public neighborhood City Park with field, tot lot and playground equipment, shade structure, paths, natural area, and other amenities to be designed and constructed by the developer and maintained by the City. This park is included in the open space calculations. Bathrooms are proposed in the club house with exterior access for the park users.
- i. A 15,000 sf (approx.) community gardens area within the PC Heights neighborhood. This area is included in the open space calculations.
- j. 3 to 4 miles of soft surface trails within and around the property and additional mile or so of hard surfaced sidewalks and paths along the Project's streets.
- k. Trail connections to the Rail Trail and Quinn's trail, including trail on the north side of Richardson Flat Road from the 248 underpass to the Rail Trail and trail on the south side of the Road from the project to the Rail Trail. Trail connection to the south property line for future connections to the Jordanelle area. Trail easement on north side of Richardson Flat Road from Rail Trail to east property line. Trail connections to the Park City and Snyderville Basin back country trails system. Trails are further described in Finding #11.
- l. Transit bus shelters along Richardson Flat road including "dial-a-ride signs" (City bus service expected to be extended to Park City Heights and the Park and Ride).
- m. Bike racks at the club house and public park.
- n. Cross walk across Richardson Flat road at the rail trail.
- o. A 3,000 sf community center/club house area to be constructed by the developer with dedicated future ancillary support uses or possible daycare center parcels (Parcels I and J as shown on the preliminary plat). Exterior

access bathrooms will be available for park users. Construction of a daycare facility would be by the owner of the daycare facility and not by the Park City Heights development.

- p. Water infrastructure improvements that enhance the City's overall water system and provide redundancy as required by the Water Agreement executed as part of the Annexation Agreement. Water shares were dedicated to the City as part of a pre-annexation agreement.
  - q. Transportation improvements to the Richardson Flat/248 intersection including lane improvements and installation of a traffic signal to provide intersection safety (controlled left turn) and putting the Park and Ride facility and Park City Heights on the City bus route. These transportation improvements meet the requirements in the Annexation Agreement.
  - r. Following Wildlife recommendations as identified in the Biological Resources Overview prepared by Logan, Simpson Design, Inc. amended March 17, 2011.
  - s. Design Guidelines approved as part of this MPD apply to all lots, with the exception of the 2 upper lots proposed to be subject to the CCRs for the Oaks at Deer Valley, or equivalent.
  - t. No sound barrier walls or structures along US 40 within or related to the MPD.
2. The Park City Heights MPD is subject to the Park City Heights Annexation Agreement approved by the City Council on May 27, 2010. The Annexation Agreement sets forth terms and conditions of annexation, zoning, affordable housing, land use, density, transportation and traffic, phasing, trails, fire prevention, road and road design, utilities and water, fiscal impact analysis, snow removal, fees, and sustainable development requirements for the 239 acre Park City Heights MPD. The MPD as conditioned is in compliance with the requirements of the Annexation Agreement.
  3. The Park City Heights Annexation Agreement includes a Water Agreement as an integral component. The Water Agreement sets forth terms and conditions related to water facilities, restrictions regarding water, and phasing of development as it relates to completion of water infrastructure. The MPD as conditioned is in compliance with the Water Agreement.
  4. On June 17, 2010, the applicants submitted a pre-MPD application based on the annexation approval and agreement. The Planning Commission reviewed the pre-MPD application at two (2) meetings (July 14 and August 11, 2010) and found the application to be in initial compliance with applicable elements of the Park City General Plan.
  5. On June 30, 2010, the applicants submitted a complete MPD application.
  6. The property was posted and notice was mailed to property owners within 300 feet. Legal notice was also published in the Park Record as required by the Land Management Code.
  7. Public hearings on the MPD were held on October 13th, November 10th, and December 8th, 2010 and on February 9th, February 23rd, March 9th and March 23rd, 2011 and on April 27, 2011.
  8. The property is located within the Community Transition (CT) zone. The MPD is in compliance with all applicable requirements of the CT zone, including density, uses,

building setbacks, building height, parking, open space, affordable housing, and sustainable development requirements.

9. Access to the site is from Richardson Flat Road, a public road previously known as Old Dump Road. Access is also proposed to the currently unimproved US 40 frontage road (UDOT) along the east property line. No roads are provided through the Park City Heights MPD to the Oaks, Royal Oaks, or any other neighborhood within the Deer Valley MPD, consistent with the Annexation Agreement.
10. Utilities are available in the area, however extension of utilities or utility upgrades to the development site are required. A final utility plan will be submitted with the final subdivision plats to be reviewed by the Interdepartmental and Utility Service providers Development Review Team. City Staff will provide utility coordination meetings to ensure that utilities are provided in the most efficient, logical manner and that comply with best practices, including consideration of aesthetics in the location of above ground utility boxes. Location of utility boxes shall be shown on the final utility plans. The MPD phasing plan shall be consistent with conditions of the Annexation Agreement related to provision of public services and facilities.
11. The MPD includes 1) a paved connector trail on the south side of and separated from Richardson Flat Road, from the project to the Rail Trail, 2) a paved connector trail on the north side of and separated from Richardson Flat Road, from the SR 248 underpass to the Rail Trail, 3) a trail connection from trails within the project to the south property boundary line, 4) a trail easement along the north side of and separated from Richardson Flat Road from the Rail Trail to the east property boundary line, and 5) several miles of paved and soft surfaced trails throughout the development. All trails will be constructed by the developer consistent with the Park City Trails Master Plan.
12. The MPD includes a dedicated neighborhood public park to be constructed by the developer according to the City's parks plan, and as further directed by the City Council. Bathrooms are provided at the clubhouse with exterior access for the park users.
13. Parking within the MPD is proposed at two spaces per unit within private garages. Additional surface parking is provided for guests, the community gardens/park area, and the neighborhood clubhouse/meeting area. The streets have been designed to allow for parking on one-side per the City Engineer. Final street design will be determined at the time of the final plat and additional off-street guest parking areas will be incorporated into the design.
14. The proposed MPD density of 1 unit per acre complies with the density allowed by the CT zone. (239 units on 239 acres) The net density is 0.82 units per acre (195 units on 239 acres), excluding the 44 required deed restricted housing units. The density is consistent with the Annexation Agreement. If the additional 35 deed restricted affordable units are included in this analysis the net density is 0.67 units per acre (160 units on 239 acres).
15. The LMC requires a Sensitive Lands Analysis for all Master Planned Development applications. The MPD application included a Sensitive Lands Analysis.
16. A portion of property is located within the designated SR 248 Entry Corridor. This area is identified in the MPD as open space and all required entry corridor setbacks of 200' are complied with.

17. The property contains SLO designated steep slopes, ridgelines and wetland areas. These areas are identified in the MPD as open space areas and all required wetland and stream setbacks are complied with.
18. A wildlife study was conducted and a report (December 2010) was prepared by Logan Simpson Design, Inc. A revised report was prepared on March 17, 2011. The wildlife study addresses requirements of the Land Management Code and provides recommendation for mitigation of impacts on wildlife.
19. The site plan complies with the minimum MPD required 25' setback around the perimeter of the property. Setbacks range from 25' to 690' (and greater to the south property line).
20. The locations of the proposed units are consistent with the MPD site planning and Sensitive Lands Overlay criteria.
21. The property is visible from the designated LMC Vantage point along State Road 248 and a visual analysis was conducted by the applicant from this Vantage point. Additional visual analysis was provided from the intersection of Richardson Flat Road and SR 248. Units along the western perimeter are most visible along the minor ridge from SR 248. Any units that are over the 28' height limit as measured in the zone will be required to obtain an Administrative Conditional Use Permit. .
22. Structures containing more than four units and future non-residential structures on Parcels I and J will be more visible due to the location along Richardson Flat Road and the potential massing. Additional review through the conditional use process is warranted for these parcels and uses.
23. Design Guidelines for the Park City Heights MPD address site planning, architecture and design, sustainability and best practices, landscaping and water conservation, and other requirements of the Annexation Agreement.
24. A comprehensive traffic study and analysis of the Property and surrounding properties, including existing and future traffic and circulation conditions was performed by the Applicant's traffic consultant, Hales Engineering, dated June 7, 2007, on file at the Park City Planning Department. An updated traffic volume and trip generation report was provided by Hales Engineering on September 27, 2010. An additional traffic update was provided in 2008 by InterPlan Co at the request of the City Transportation Department. The Hales Engineering study was utilized during the annexation process in the determination of density and requirements for traffic and transportation related impact mitigations. The City's Transportation Department is preparing a Short range Transit Development Plan studying demand for transit, routes, efficiency of the transit system, etc to be completed in July of 2011. This Transit Plan will address the timeline for bus service in the Quinn's Junction area. The City's Transportation Master Plan update will include the projected traffic from Park City Heights MPD in the recommendations for transportation improvements within the City.
25. Construction traffic is required to be addressed in the Construction Mitigation Plan.
26. A Geotechnical Study for the Park City Heights Development was provided by Gordon, Spilker Huber Geotechnical Consultants, Inc. (June 9, 2006). Expansive clay soils were encountered across the site in the upper two and one-half to nine and one-half feet. Shallow bedrock was found within portions of the site. Special construction methods, removal of these unsuitable soils, and other mitigations are spelled out in the Study.

27. A Fire Protection Report (March 2011) identifies potential Wildland urban interface areas within the MPD. Prior to issuance of building permits the Building Department will review individual building fire protection plans for compliance with recommendations of the Fire Protection Report and applicable building and fire codes. The fire protection component of the plan shall ensure that Park City's ISO rating is not negatively affected by development of the site.
28. Affordable housing obligations of the MPD are consistent with the affordable housing described by the Park City Heights Annexation Agreement, Housing Resolution 17-99 and as required by the CT zone. The MPD provides up to an additional 35 deed restricted housing units over the 28 deed restricted townhouse units (44.78 affordable unit equivalents (AUE) required by the IHC MPD and the 16 deed restricted units (32 AUE) required by the CT zone for the 160 market rate units). These affordable units are configured as a mix of single-family detached, duplexes, cottage units, and attached townhouse units. The additional 35 non-required deed restricted affordable units are proposed to be a mix of unit types as part of this MPD consistent with the needs described in Housing Market Assessment for Park City, dated September 2010. As part of the mix of unit types, rental housing will be considered consistent with the needs described in the September 2010 Housing Market Assessment.
29. No building height exceptions have been requested and all buildings will comply with the height limitations of the CT zone.
30. Lots have been positioned to minimize visual impacts on adjacent structures. Potential problems on neighboring properties caused by shadows, loss of solar access, and loss of air circulation, have been mitigated to the extent possible as further described in the Park City Heights Design Guidelines.
31. Utilities must be extended to the site to sustain the anticipated uses. Thirty (30') foot wide non-exclusive utility easements are generally necessary for long term maintenance and shall be dedicated on the final subdivision plats. Off-site improvements are necessary to serve the site with utilities.
32. Off-site trail and intersection improvements may create traffic delays and potential detours, short term access and private driveway blockage, increased transit time, parking inconveniences, and other impacts on the adjacent neighborhoods and to the community in general. Construction Mitigation Plans are required and shall be required to include mitigation for these issues.
33. A Construction Mitigation Plan (CMP) is necessary to identify impacts and propose reasonable mitigation of these impacts on the site, neighborhood, and community due to construction of this project. The CMP shall include information about specific construction phasing, traffic, parking, service and delivery, stock-piling of materials and staging of work, work hours, noise control, temporary lighting, trash management and recycling, mud and dust control, construction signs, temporary road and/or trail closures, limits of disturbance fencing, protection of existing vegetation, erosion control and storm water management.
34. Final road designs will be provided to the Planning Commission for review with the final subdivision plats. To minimize visual impacts and to minimize disturbance of existing vegetation due to large areas of cut and fill slopes, low retaining structures (in steps of 4' to 6') are recommended. These low retaining structures may be stepped to minimize their height. Design of these retaining structures is included in

the PC Heights Design Guidelines to ensure consistency of design, materials, and colors throughout the development.

35. A storm water run-off and drainage plan is necessary to ensure compliance with Park City's Storm Water Management Plan and storm water Best Management Practices for storm water during construction and post construction with special considerations to protect the wetlands delineated on and adjacent to the site.
36. A financial guarantee for all landscaping and public improvements is necessary to ensure completion of these improvements and to protect the public from liability and physical harm if these improvements are not completed by the developer or owner in a timely manner. This financial guarantee is required prior to building permit issuance.
37. Parcels I and J are identified on the preliminary subdivision plat as potential future support commercial and/or child care center or similar uses pad sites. These parcels are currently used as a temporary, dirt parking lot. Construction of a daycare center is not the responsibility of the applicant/developer of Park City Heights.
38. A master sign plan is required for Planning Department review and approval and all individual signs require a sign permit prior to installation.
39. Sound mitigation may be desired by owners of units along US 40. Conditions of approval prohibit sound barrier walls within the MPD. However, other sound mitigation measures may be accomplished with landscaping, berming, smart housing design and insulation, and sound barriers constructed as part of the dwelling units.
40. Section 15-6-4 (G) of the LMC states that once the Planning Commission has approved an MPD, the approval shall be put in the form of a Development Agreement.
41. The applicant stipulates to the conditions of approval.
42. The discussion in the Analysis sections of this report and the Analysis sections of the March 23, 2011 Planning Commission Staff Report (Exhibit A) are incorporated herein.
43. The applicants have met with Rocky Mountain Power and have increased the Rocky Mountain Powerline setbacks as required by this Utility.
44. The site plan for the proposed MPD has been designed to minimize the visual impacts of the development from the SR 248 Entry Corridor and has preserved, through open space, the natural views of the mountains, hillsides and natural vegetation consistent with Park City's "resort character".
45. The 171.5 acres of open space adjacent the development, the trail connections and improvements, and proposed neighborhood public park, as conditioned, will provide additional recreational opportunities to the Park City community and its visitors, which strengthens and enhances the resort character of Park City.
46. The opportunities for mixed affordable housing types, including rental units, within the development will strengthen the resort economy by providing attainable housing options in a sustainable and energy efficient community for workers in Park City's tourism/resort based industries.
47. Surrounding uses include open space, Highway 248, US 40, the Rail Trail, the Municipal Water Treatment Plant, Quinn's recreation complex (fields and ice rink), and the IHC medical center and offices

48. The MPD provides direct connection to and critical improvements of the Rail Trail and provides alternative transportation opportunities for recreation and commuting, such as biking, walking, in-line skating, and cross country skiing to Park City's business district at Prospector Square (within 2 miles) and to the IHC medical complex.

#### Conclusions of Law

1. The MPD, as conditioned, complies with all requirements outlined in the applicable sections of the Land Management Code, specifically Chapter 6- Master Planned Developments Section 15-6-5 as stated in Exhibit A, March 23, 2011 Planning Commission Staff Report.
2. The MPD, as conditioned, is compatible with surrounding structures in use, scale, mass, and circulation.
3. The MPD, as conditioned, is consistent with the Park City General Plan.
4. The MPD, as conditioned, is consistent with the Park City Heights Annexation Agreement.
5. The MPD, as conditioned, strengthens and enhances the resort character of Park City
6. The MPD, as conditioned, is Compatible in use, scale and mass with adjacent properties, and promotes neighborhood Compatibility.
7. The MPD provides amenities to the community so that there is no net loss of community amenities.
8. The MPD is consistent with the employee Affordable Housing requirements as adopted by the City Council at the time the Application was filed.
9. The MPD has been designed to place Development on the most Developable Land and preserves significant features and vegetation to the extent possible.
10. The MPD promotes the Use of non-vehicular forms of transportation through the site design and by providing trail connections.
11. The MPD has been noticed and public hearings held in accordance with the LMC.

#### Conditions of Approval

1. All standard project conditions shall apply (Attached).
2. A final subdivision plat for each phase, or sub phase, of development shall be submitted for review by the Planning Commission and City Council and shall be recorded prior to issuance of building permits for individual units within that plat. The plats shall be consistent with the LMC, preliminary plat and the PC Heights site plan and documents reviewed and approved by the Planning Commission during the MPD approval. Final street design, including final cut and fill calculations and limit of disturbance areas, shall be submitted with all final subdivision plats to be reviewed and approved by the Planning Commission during final subdivision review. Off-street guest parking areas shall be identified on the final plats.
3. A limit of disturbance area (LOD), maximum building footprint and/or house size limitation and a setback requirement table for the lots shall be included on the final plats consistent with the Park City Heights Design Guidelines.

4. A note shall be added to the final plats stating that a landscape plan shall be submitted for City review and approval for each lot, prior to building permit issuance for that lot.
5. A note shall be added to the final plats stating that all units (including all deed restricted units) shall be constructed to LEED for Homes Silver rating, as stated in the Annexation Agreement, with each unit also achieving a minimum combined 10 points for water efficiency/conservation. Third party inspection will be provided to confirm compliance with the standards. An industry standard Third Party inspector shall be mutually agreed upon by the Chief Building Official and the applicant prior to building permit issuance.
6. A final landscaping and irrigation plan for common areas shall be submitted with the final plats for each phase. Entry and perimeter landscaping shall be completed within six (6) months of issuance of the first building permit, weather and ground conditions permitting. Other Project landscaping, shall be completed within nine (9) months of issuance of 50% of building permits or within six (6) months of any individual Certificate of Occupancy. Landscaping materials and irrigation shall comply with the requirements of the Annexation Agreement, including the Water Agreement, and the Park City Heights Design Guidelines.
7. All exterior building materials, colors and final design details must comply with the approved Park City Heights Design Guidelines and shall be approved by staff prior to building permit issuance.
8. All exterior lighting, including any street and/or path lighting shall be designed to limit the trespass of light into the night sky as much as possible and shall conform to the LMC Sections 15-5-5-(I) and 15-3-3(c) and the Park City Heights Design Guidelines.
9. All exterior lighting, with the exception of bollard lighting at the park shall be privately maintained.
10. A Construction Mitigation Plan (CMP) shall be submitted and approved by the City for compliance with the Municipal Code, as a condition precedent to issuance of any grading or building permits. The CMP shall address construction phasing, staging, storage of materials, circulation and traffic, parking, service and delivery, re-vegetation of disturbed areas, temporary signs and construction lighting, hours of operation, dust and mud control, storm water management, and other items as may be required by the Building Department. The immediate neighborhood and community at large shall be provided notice at least 24 hours in advance of construction work impacting private driveways, street closures, and interruption of utility service. The CMP shall include a site and landscape plan for the sales office building (either within the clubhouse or within a finished unit) to address landscaping, lighting, and parking for the sales office. Construction Mitigation Plans shall provide mitigation measures for traffic delays and potential detours, short term access and private driveway blockage, increased transit time, parking inconveniences, and other impacts on the adjacent neighborhoods and to the community in general.
11. The CMP shall address disposal and treatment of all excavated materials. The capping of exposed soils within the City's Soils Ordinance Boundary is subject to all applicable regulations and requirements of the Park City Soils Ordinance Title 11, Chapter 15- Park City Landscaping and Maintenance of Soil Cover. A detailed Limit

- of Disturbance (LOD) plan shall be submitted as part of the CMP. The Limits of Disturbance for the entire site shall be minimized to the greatest extent possible, using best construction practices, and shall include the use of additional low retaining walls and steeper slopes to prevent unnecessary disturbance of native vegetation.
12. A construction recycling area and an excavation materials storage area shall be provided within the development to reduce the number of construction trips to and from the development. This condition applies at a minimum to the first two phases of development and may be waived for subsequent phases of development upon request by the applicant and upon review by the Planning, Building, and Engineering Departments.
  13. A storm water run-off and drainage plan shall be submitted with the building plans and approved prior to issuance of any building permits. The plan shall follow Park City's Storm Water Management Plan and the project shall implement storm water Best Management Practices. Post development drainage shall not exceed pre-development drainage conditions and special consideration shall be made to protect the wetlands delineated on and adjacent to the site.
  14. Maintenance of sidewalks (including, without limitation, snow removal), trails, lighting, and landscaping within the rights-of-way and common areas, with the exception of the public park and public trails, shall be provided by the HOA, unless otherwise agreed upon by the City Council. Language regarding ownership and maintenance of the open space and common areas shall be included on the final subdivision plats.
  15. A financial guarantee, in a form and amount acceptable to the City and in conformance with the LMC Subdivision Regulations, for the value of all public improvements, pedestrian amenities and trails, sidewalks, bus stop amenities, landscaping (including landscaping to re-vegetate and re-landscape areas disturbed by construction related to the MPD) to be completed according to the final approved plans shall be provided to the City prior to building permit issuance for new construction within each phase of construction. All public improvements shall be completed according to City standards and accepted by the City Council prior to release of this guarantee.
  16. Final utility plans, consistent with preliminary utility plans reviewed by the Planning Commission during the MPD review, shall be submitted with the final subdivision plats. Utility plans shall be reviewed by the Interdepartmental staff members and the utility service providers as the Development Review Team. Utilities for the MPD shall be placed underground.
  17. The City Engineer shall review and approve all associated utility and public improvements plans (including streets and sidewalks, grading, drainage, trails, public necessity signs, street signs and lighting, and other required items) for compliance with the LMC and City standards as a condition precedent to final subdivision plat recordation. This shall include phasing plans for street construction to ensure adequate fire turn-around that minimize disturbance of native vegetation. Due to expansive soils in the area, grading and drainage plans shall include a comprehensive lot drainage plan for the entire phase of each final subdivision plat.
  18. Above ground utility boxes must be shown on the final utility plans. The location of these boxes shall comply with best practices for the location of above ground utility boxes. These boxes shall be located in the most efficient, logical, and aesthetic

locations, preferably underground. If located above ground the boxes shall be screened to minimize visual impacts and locations shall be approved by the City Engineer.

19. The Snyderville Basin Water Reclamation District's review and approval of the utility plans and final subdivision plats, for conformance with the District's standards for review, is a condition precedent to plat recordation and building permit issuance.
20. All construction, including grading and trails, within the Park City Soils Ordinance area shall comply with restrictions and requirements of the Park City Soils Ordinance (Municipal Code Title 11, Chapter 15).
21. Trail improvements necessary to connect the Rail Trail to the Hwy 248 tunnel trail on the north side of Richardson Flat Road, as well as the trail connection from the Rail Trail to the public park on the south side of Richardson Flat Road, will likely impact the wetlands in this area. Precedent to issuance of a building permit for these trails a wetlands impacts and enhancements plan shall be reviewed by the Planning Staff. All required wetlands permits shall be obtained from the required agencies.
22. Mitigation for the disturbance of any wetland areas shall be identified on the trail construction plan and shall include enhancements of wetlands as an amenity feature for users of the trail system.
23. Enhancements to wetland areas and other disturbed areas within the MPD could include but are not limited to: educational signs, such as identification of plants and animals, ecological processes, wetlands ecology, and insights into seasonal changes to the landscape; plantings that encourage and/or provide food sources for wildlife; additional on-site water sources; clean up of degraded areas; and new nesting habitat/bird and small mammal boxes.
24. Lots 89 and 90 of the preliminary subdivision plat shall be shifted to match the trail phasing plan to locate the trail connection on the open space.
25. All construction, including streets, utilities, and structures shall comply with recommendations of the June 9, 2006, Geotechnical Study for the Park City Heights Development provided by Gordon, Spilker Huber Geotechnical Consultants, Inc. Special construction methods, removal of unsuitable soils, and other mitigation measures are recommended in the Study. Additional soils studies and geotechnical reports may be required by the Building Department prior to issuance of building permits for streets, utility installation, and structures.
26. A detailed review against the Uniform Building and Fire Codes in use at the time of building permit submittal is a condition precedent to issuance of full building permit.
27. Fire protection and emergency access plans shall be submitted prior to the issuance of any building permits and shall be consistent with applicable building and fire codes and shall take into consideration the recommendations of the Fire Protection Report (March 2011). The fire protection plans shall include any required fire sprinkler systems and landscaping restrictions within the Wildland interface zones. The plans shall ensure that Park City's ISO rating is not negatively affected by the development.
28. A limit of disturbance area shall be identified during the building permit review and construction fencing will be required to mitigate construction impacts. Silt fencing is required during construction in areas where run-off and construction may impact adjacent wetlands, water ways, and undisturbed areas as determined by the

Building Department.

29. Trail easements for all proposed trails in the MPD shall be platted on the final recorded subdivision plats. All trails shall be constructed consistent with the Park City Trails Master Plan and the Snyderville Basin Trails Master Plan. Connections to undeveloped property to the south providing future connections to the Wasatch County shall be consistent with the Wasatch County Trails Plan.
30. Construction of the public park, trails within the first phase, trail connections to the Rail Trail on both the north and south sides of Richardson Flat road, as described in the findings, and other neighborhood amenities associated with the first phase, shall commence upon issuance of the 40th building permit for Phase I (as described in the Annexation Agreement) and shall be complete within 9 months from commencement of construction, unless otherwise directed by City Council. In subsequent phases, trails, amenities, and other improvements shall be completed prior to issuance of 50% of the certificates of occupancy for the units within that phase, or as otherwise stated in the Development Agreement.
31. The neighborhood public park shall be developed in accordance with standards set forth and required by the City Council, Recreation Advisory Board and city standards. A minimum area of 100 by 80 yards shall be initially free from fixed improvements until final field design is approved or further conditioned at subdivision approval. The park will include bathrooms in the club house with exterior access for park users.
32. An Affordable Housing Plan, consistent with the Park City Heights Annexation Agreement and as required by LMC Section 15-6-5 (J), shall be reviewed by the Planning Commission and a recommendation shall be forwarded to the Park City Housing Authority. The Park City Housing Authority shall approve the final Park City Heights Affordable Housing Plan prior to issuance of any building permits for units within the MPD.
33. As a condition precedent to receiving a certificate of occupancy for any market rate unit the City shall be provided with proof of compliance with the approved Affordable Housing Plan.
34. A master sign plan for the neighborhood shall be submitted, reviewed for compliance with the Park City Sign Code, and approved by the City, as a condition precedent to issuance of any individual sign permits.
35. No sound barrier walls or structures along Hwy 40 are permitted within the MPD. To the extent sound mitigation measures are utilized within the MPD, such measures shall be limited to landscaping and berms, energy efficient housing design and insulation, and sound mitigation constructed as part of the design of the dwelling units and shall be reviewed by the Planning Department for compliance with the Design Guidelines.
36. Approval of this Master Planned Development is subject to LMC Chapter 6- Master Planned Developments and shall expire two years from the date of execution of the Development Agreement unless Construction, as defined by the Uniform Building Code, has commenced on the project.
37. Pursuant to Section 15-6-4 (G) of the LMC, once the Planning Commission has approved an MPD, the approval shall be put in the form of a Development Agreement. The Development Agreement must be ratified by the Planning Commission within 6 months of this approval. The Development Agreement shall be

signed by the Mayor on behalf of the City Council and recorded with the Summit County Recorder.

38. The Park City Soils Boundary shall be identified on the final plats (if applicable).
39. Timing of completion of all required items and public benefits shall be further described and stated in the Development Agreement.
40. No through roads may be provided through the Park City Heights MPD to the Deer Valley MPD subdivisions.
41. A re-vegetation plan for Parcels I and J and the open space parcel at the northeast corner of the development area of Phase I shall be submitted with the final road and utility plans. Re-vegetation of these parcels shall be completed prior to issuance of the 28th certificate of occupancy for the Park City Heights MPD. If this area is used as a construction staging, construction recycling area, and excavated materials storage area, a new construction staging area will need to be approved by the Planning Department for the remainder of Phase I and for subsequent phases and shall be re-vegetated in a like manner with the issuance of certificates of occupancy for the final units in the respective phase.
42. Noxious weeds shall be managed per the Summit County noxious weeds ordinances during construction and in perpetuity by including regulations in the CMP, Design Guidelines, and CCRs.
43. One additional site visit is required by certified biologists during May or June 2011 to: a) validate the observations of the preliminary biological report and, b) to further study and identify wildlife movement corridors, evidence of species of high public interest (Elk, Moose, Deer, and other small mammals), locations of den or nesting sites, and any areas of high native species diversity. The report shall include additional recommendations on mitigating impacts of the development on wildlife and wildlife corridors. The report shall be provided to the Planning Department and reviewed by the Planning Commission prior to issuance of any grading or building permits.
44. Clearing and grubbing of vegetation and soils shall be minimized from April through July to avoid disturbance of nesting birds, unless a detailed search for active nests is conducted and submitted to the Planning Director for review by a certified wildlife biologist.
45. As a condition precedent to building permit issuance for any structure containing more than 4 units, and for any non-residential structure proposed to be constructed on Parcels I and J of the preliminary subdivision plat, a conditional use permit shall be approved by the Planning Commission.
46. Due to the visual exposure of these lots on the minor ridge, as a condition precedent to building permit issuance for construction of a house on the western perimeter lots, namely Lots 23, 24, 30, 31, 66, 67, 76 and 77 of the preliminary subdivision plat prepared by Ensign and dated 1/17/11, a conditional use permit shall be obtained if the proposed building height is greater than 28 feet.
47. The applicants shall approach the adjacent property owner to the west to explore a mutually agreeable plan for incorporating the parcel into the Park City MPD and transferring density to the Park City Heights neighborhood in exchange for open space designation of this highly sensitive and visible parcel of land and the potential to relocate the upper western cul-de-sac to a less visible location.

48. All work within the Rail Trail ROW requires review by and permits issued by the Utah State Parks/Mountain Trails Foundation, in addition to the City. The Rail Trail shall remain open to pedestrians during construction to the extent possible.
49. High energy use amenities, such as snow melt systems, heated driveways, exterior heated pools and fireplaces, shall require energy off-sets and/or require the power to be from alternative energy sources.
50. All conditions, requirements, and stipulations of the Park City Heights Annexation Agreement and Water Agreement continue to apply to this MPD.
51. The final MPD phasing plan shall be consistent with conditions of the Water Agreement as to provision of public services and facilities.
52. All transportation mitigation requirements, as stated in the Annexation Agreement, continue to apply to this MPD.
53. The Applicant must meet all applicable bonding requirements.
54. Bus shelters on both the north and south sides of Richardson Flat Road shall be constructed within 60 days of issuance of the 40th certificate of occupancy. The shelter design and location shall be approved by the City Planning, Engineering, Building, and Transportation Departments and shall include a sign with the phone number of the Park City Bus service dial-a-ride. Information regarding the dial-a-ride service shall be posted within the shelters.
55. Sheet c4.0 (LOD Erosion Control Plan) shall be amended as follows: Note 1 shall read that the LOD for roadways is not to extend beyond 3' from the cut/fill limits as shown on the plan. Note 2: A 4 to 6 foot engineered wall shall be used in areas outside the limits of future home and driveway construction and where proposed cut/fill is in excess of 10' vertical as measured from the top back of curb to cut/fill catch point. Note 3: Proposed retaining walls shall not exceed 6 feet where they are necessary. A system of 4' to 6' walls with no individual wall exceeding 6', (i.e. tiered walls) may be used. The walls shall be separated by a 3' landscaped area from top back of lower wall to toe of upper wall. Note 4: Exceptions to these standards may be granted by the Planning Commission at the time of final subdivision plat review as necessary to minimize overall total disturbance.
56. House size limitations for all lots within the MPD shall be identified in the Design Guidelines subject to further appropriate reduction if found necessary during the final subdivision plat process, taking into consideration the size of the lots, visibility of the lots from the LMC Vantage Points, solar access of adjacent lots, onsite snow storage, and ability to achieve LEED for Homes Silver rating to meet the applicable standards of LMC 15-7.3-3. Nothing herein shall preclude the applicant from proposing alternative methods of mitigation. Specifically, and without limitation, the Design Guidelines shall provide that house sizes of the Homestead lots shall be no greater than the following (as delineated below by lot numbers per the preliminary plat prepared by Ensign and dated 1/17/11)

Lots 58 thru 66- 4000 square feet  
Lots 130 thru 154- 4000 square feet  
Lots 163 thru 164- 4000 square feet  
Lots 70 thru 72- 5000 square feet  
Lots 105 thru 129- 5000 square feet  
Lots 155 thru 156- 5000 square feet

Lots 77 thru 98- 6000 square feet

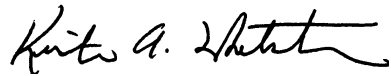

The Design Guidelines shall reflect a preference for smaller homes consistent with (a) "best practices" in sustainable design and development to address the materials and energy impacts of larger homes and (b) the historic pattern of residential development in Old Town

57. The Park City Heights Design Guidelines shall be approved by the Planning Commission prior to the submittal of the Development Agreement to the Planning Commission and before any activity or permits can be pulled for the MPD. No pre-development work, including grading, clearing, etc. can occur prior to approval of the Design Guidelines by the Planning Commission.
58. The Park City Heights Design Guidelines are an integral component of the Park City Heights MPD and substantive amendments to the Design Guidelines require Planning Commission approval. Minor amendments shall be reviewed by the Planning Director for consideration and approval.
59. Adequate snow storage easements, as determined in consultation with the Park City Public Works, will be granted to accommodate for the on-site storage of snow. Snow storage shall not block internal pedestrian sidewalks and circulation trails. Removal of snow from the Park City Heights MPD is discouraged with the final decision to haul snow from this area to be made by the City's Public Works Director.
60. To further encourage non-vehicular transportation, trail maps will be posted in the clubhouse for the benefit of future residents. There will also be a ride-share board located within the clubhouse that residents may utilize in order to plan carpooling which will further limit trips from the development. The dial-a-ride phone number shall be posted at the ride-share board. The HOA shall post information and consider a bike-share program.
61. The Park City Heights Design Guidelines and CCRs shall include information related to the history of the site and Quinn's Junction region.
62. All transportation mitigation elements, as required by the Park City Heights Annexation Agreement (July 2, 2010) continue to apply to this MPD. The Applicants, as required by the Annexation Agreement, shall complete, with the first Phase (first 90 UEs) of the MPD (as described in the Annexation Agreement), the SR 248/Richardson Flat intersection improvements with all required deceleration and acceleration lanes; and shall include the required infrastructure (fiber optic, control boxes, computer links, etc.) to synchronize this traffic signal with the UDOT coordinated signal system on SR 248, within the Park City limits at the time of this MPD. At the time the traffic signal is installed, the Applicants shall request in writing that UDOT fully synchronize signals along SR 248, with supporting data as applicable. Required improvements to Richardson Flat Road, including 5' wide bike lanes, as stated in the Annexation Agreement, shall be complete with the first Phase (first 90 UEs) of the MPD. The cost sharing methodology between the Applicants and any assigns, for these mitigation elements, shall be detailed in the Park City Heights Development Agreement. The Applicant shall provide an annual assessment of traffic counts and bus needs generated by the MPD for five (5) consecutive years following issuance of the first certificate of occupancy. The applicants shall participate with the City to conduct an annual assessment, which

shall include peak period counts of both summer and winter traffic in the vicinity of the SR 248/Richardson Flat Road intersection, and submit such to UDOT. This information shall be coordinated with best available UDOT data and analysis. This assessment shall be incorporated into ongoing Park City Transportation Master Plan and the Park City Transit planning efforts with UDOT. This information shall be presented annually to the Planning Commission in conjunction with an update of the City Transportation Master Plan.

PARK CITY MUNICIPAL CORPORATION  
STANDARD PROJECT CONDITIONS

1. The applicant is responsible for compliance with all conditions of approval.
2. The proposed project is approved as indicated on the final approved plans, except as modified by additional conditions imposed by the Planning Commission at the time of the hearing. The proposed project shall be in accordance with all adopted codes and ordinances; including, but not necessarily limited to: the Land Management Code (including Chapter 5, Architectural Review); International Building, Fire and related Codes (including ADA compliance); the Park City Design Standards, Construction Specifications, and Standard Drawings (including any required snow storage easements); and any other standards and regulations adopted by the City Engineer and all boards, commissions, agencies, and officials of the City of Park City.
3. A building permit shall be secured for any new construction or modifications to structures, including interior modifications, authorized by this permit.
4. All construction shall be completed according to the approved plans on which building permits are issued. Approved plans include all site improvements shown on the approved site plan. Site improvements shall include all roads, sidewalks, curbs, gutters, drains, drainage works, grading, walls, landscaping, lighting, planting, paving, paths, trails, public necessity signs (such as required stop signs), and similar improvements, as shown on the set of plans on which final approval and building permits are based.
5. All modifications to plans as specified by conditions of approval and all final design details, such as materials, colors, windows, doors, trim dimensions, and exterior lighting shall be submitted to and approved by the Planning Department, Planning Commission, or Historic Preservation Board prior to issuance of any building permits. Any modifications to approved plans after the issuance of a building permit must be specifically requested and approved by the Planning Department, Planning Commission and/or Historic Preservation Board in writing prior to execution.
6. Final grading, drainage, utility, erosion control and re-vegetation plans shall be reviewed and approved by the City Engineer prior to commencing construction. Limits of disturbance boundaries and fencing shall be reviewed and approved by the Planning, Building, and Engineering Departments. Limits of disturbance fencing shall be installed, inspected, and approved prior to building permit issuance.
7. An existing conditions survey identifying existing grade shall be conducted by the applicant and submitted to the Planning and Building Departments prior to issuance of a footing and foundation permit. This survey shall be used to assist the Planning Department in determining existing grade for measurement of

building heights, as defined by the Land Management Code.

8. A Construction Mitigation Plan (CMP), submitted to and approved by the Planning, Building, and Engineering Departments, is required prior to any construction. A CMP shall address the following, including but not necessarily limited to: construction staging, phasing, storage of materials, circulation, parking, lights, signs, dust, noise, hours of operation, re-vegetation of disturbed areas, service and delivery, trash pick-up, re-use of construction materials, and disposal of excavated materials. Construction staging areas shall be clearly defined and placed so as to minimize site disturbance. The CMP shall include a landscape plan for re-vegetation of all areas disturbed during construction, including but not limited to: identification of existing vegetation and replacement of significant vegetation or trees removed during construction.
9. Any removal of existing building materials or features on historic buildings shall be approved and coordinated by the Planning Department according to the LMC, prior to removal.
10. The applicant and/or contractor shall field verify all existing conditions on historic buildings and match replacement elements and materials according to the approved plans. Any discrepancies found between approved plans, replacement features and existing elements must be reported to the Planning Department for further direction, prior to construction.
11. Final landscape plans, when required, shall be reviewed and approved by the Planning Department prior to issuance of building permits. Landscaping shall be completely installed prior to occupancy, or an acceptable guarantee, in accordance with the Land Management Code, shall be posted in lieu thereof. A landscaping agreement or covenant may be required to ensure landscaping is maintained as per the approved plans.
12. All proposed public improvements, such as streets, curb and gutter, sidewalks, utilities, lighting, trails, etc. are subject to review and approval by the City Engineer in accordance with current Park City Design Standards, Construction Specifications and Standard Drawings. All improvements shall be installed or sufficient guarantees, as determined by the City Engineer, posted prior to occupancy.
13. The Snyderville Basin Water Reclamation District shall review and approve the sewer plans, prior to issuance of any building plans. A Line Extension Agreement with the Snyderville Basin Water Reclamation District shall be signed and executed prior to building permit issuance. Evidence of compliance with the District's fee requirements shall be presented at the time of building permit issuance.
14. The planning and infrastructure review and approval is transferable with the title to the underlying property so that an approved project may be conveyed or

assigned by the applicant to others without losing the approval. The permit cannot be transferred off the site on which the approval was granted.

15. When applicable, access on state highways shall be reviewed and approved by the State Highway Permits Officer. This does not imply that project access locations can be changed without Planning Commission approval.
16. Vesting of all permits and approvals terminates upon the expiration of the approval as defined in the Land Management Code, or upon termination of the permit.
17. No signs, permanent or temporary, may be constructed on a site or building without a sign permit, approved by the Planning and Building Departments. All multi-tenant buildings require an approved Master Sign Plan prior to submitting individual sign permits.
18. All exterior lights must be in conformance with the applicable Lighting section of the Land Management Code. Prior to purchase and installation, it is recommended that exterior lights be reviewed by the Planning Department.
